**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 83-98 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 83-87 is the inclusion of the limitation of a light source for an image writing apparatus that includes converting structures, disposed on said substrate so as to respectively correspond to said light emitting elements, for converting an advancing direction of light emitted in a direction perpendicular to the substrate from said light emitting elements to be in a direction parallel to said substrate. It is this limitation found in the claims, as it is claimed in the combination of, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 88-90 is the inclusion of the limitation of a light source for an image writing apparatus that includes light emitting elements on said converting structures, respectively, and arranged in a main scanning direction of said substrate, for emitting light in a direction perpendicular to said substrate to said converting structures such that an advancing direction of the light is converted by said converting structures so as to be in a direction parallel to said substrate . It is this limitation found in the claims, as it is claimed in the combination of, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 91-95 is the inclusion of the limitation of a light source for an image writing apparatus that includes a converting structure, disposed on said substrate and common to said light emitting elements, for converting an advancing direction of light emitted in a direction perpendicular to the substrate from said light emitting elements to be in a direction parallel to said substrate. It is this limitation found in the claims, as it is claimed in the combination of, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 96-98 is the inclusion of the limitation of a light source for an image writing apparatus that includes light emitting elements, on said converting structure and arranged in a main scanning direction of said substrate, for emitting light to said converting structure such that an advancing direction of the light emitted perpendicular to the substrate is converted by said converting structure so as to be in a direction .parallel to said substrate. It is this limitation found in the claims, as it is claimed in the combination of, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US 5,808,657 discloses an imaging apparatus with a multiple lenslet array to modify the direction of beams of light.

US 6,025,863 teaches an imaging device with figure 3 used to modify beam direction.

US 2001/0026393 discloses an imaging device wherein converting means manipulate beams to improve imaging.

US 6,636,252 discloses an imaging device that includes a lens array on a substrate emitting beams towards a converting means towards a medium that lies perpendicular to incoming beams.
